

Executive Summary

Microsoft and Interoperability

Interoperability @ Microsoft

London
18 May 2009

Paul Lorimer
Group Manager, Office Interoperability

Working Together to Improve Interoperability

- Standards Engagement
 - SC 34 / WG4 & WG5
 - ODF TC, OIC TC, OpenFormula SC
- Transparency
 - Publication of detailed implementer notes
 - Documentation of protocols and file formats
- Ongoing Dialog and Engagement
 - DII workshops
 - Participation in other interoperability events
 - Blogging (explain engineering decisions)

Validator and Document Test Library

- These projects were launched in response to feedback from attendees of DII workshops
- Fraunhofer will cover today their current plans and the work to date
- Please share your feedback during the roundtable discussion:
 - Technical strategy and architecture
 - Process and logistics
 - How the community can contribute/participate
